Aïcha El khamlichi, engineer at ADEME

Aïcha El khamlichi received a PhD in 2010 in Chemistry from University of Rennes 1 after graduating from ENSCR Rennes as chemical engineer in 2007. She works for ADEME (the French Agency for Environment and Energy) as an engineer specialised in capture, use and storage of CO₂. She leads in particular several studies on CO₂ conversion by chemical or biological transformation. Aïcha takes care since 2012 of the secretariat of the “Club CO₂”, the French national hub in the field of CO₂ capture, transport, use and storage (CCUS), bringing together the major stakeholders from industry and research.
