Dr Antonio Oliveira, Bioeconomy and Climate Change Adviser at Centre for Strategic Studies and Management

Antonio Oliveira holds a bachelor's and a master degree in Mechanical Engineering, both obtained from the Federal University of Para - Brasil, and a doctorate in Chemical Engineering and Applied Chemistry from Aston University in the UK.

He has worked for over ten years with the energy sector, with a focus on renewable fuels and thermal processing of biomass, developing biomass reactors and experimental protocols. He has also worked as a lecturer of Fluid Power, Thermodynamics and Heat Transfer.

Currently, he works as adviser of the Centre for Strategic Studies and Management - CGEE, developing studies and writing reports and policy papers to subsidize public policies in the areas of energy, bioeconomy and climate change.
