

## **Fjo De Ridder, EnergyVille/VITO**

Fjo De Ridder made a PhD in System Identification at the VUB (2004). His long term passion is the application of mathematical solutions to real world problems. Since 2007 he is active in the energy technology, where control systems for large energy storage systems and trading strategies for energy markets are developed. Currently, most efforts are concentrated to enable a further out role of renewable energy resources in our energy landscape.
