

Johan Van Bael, EnergyVille/VITO

Johan Van Bael (male) has a Master's Degree in electromechanical engineering. As a project manager since 1995 he worked on several regional, national and European projects both for the government and for the industry on cooling and heating systems, conversion systems (ORC and heat pumps), cogeneration, thermal energy storage, district heating and cooling systems and renewable energy sources. He is currently project manager for the research group on conversion systems (heat pumps and ORC), thermal energy storage and geothermal energy. Johan is expert in different European projects like FP7 Merits, FP7 E-Hub, H2020 Story and different KIC EIT projects like KIC Energy Storage, KIC Estore and KIC Flex².
