

## **Marcel Meeus, consultant to EMIRI, Sustesco bvba**

After finishing master studies in inorganic chemistry at the Catholic University of Leuven (Belgium), M. Meeus obtained in 1973 a PhD on “The manufacture and characterization of intrinsic germanium”.

M. Meeus started his career at Metallurgy Hoboken- Overpelt (progressively transformed into the present Company Umicore) in 1970 and since then he held several and highly diversified functions within this Company on several levels like Research & Development, Production, Application Management, Business Development and Battery Business Line Management.

In 2007 he took up the coordination of a team focused on Technology Scouting for Umicore with a particular focus on Clean Technologies and Energy Storage.

In 2010 he re-joined the Business Line Rechargeable Battery Materials as Energy Storage Technology Director.

January 2013 he retired after 42 years with Umicore and he started a private consulting company SUSTESCO, Sustainable Energy Services Consulting.
