

**Sébastien Rembauville-Nicolle,**

**Direction of Transport and Storage Division, Forsee Power**

Sébastien Rembauville-Nicolle is Director of the Transport and Storage Division at Forsee Power, the specialist in lithium-ion smart battery systems for the electric transport, portable and mobile equipment and energy storage markets. Sébastien joined Forsee Power in 2013 to develop activities in large battery systems for transport applications such as railway, bus, and marine.

Prior to joining Forsee Power, Sébastien worked for Dow Kokam (2010-2013), serving successively as CFO and Global Market Manager of ESS solutions, and for Dassault - Société de Véhicules Electriques (2005-2009), a subsidiary of Dassault Group focusing on electric vehicle development. He was instrumental in the M&A transaction that led to the acquisition of Dassault-SVE by Dow Kokam in 2010.

Sébastien also held various positions in private equity investment at Dassault Group, working with Dassault Développement (venture capital) and Groupe Industriel Marcel Dassault (Dassault family holding).

Sébastien graduated from HEC School of Management and also holds a Masters' degree in law from Paris-Assas University in France.
