Sven van der Gijp, Research Manager Sustainable Geo Energy at TNO

Dr. Sven van der Gijp is department manager at TNO, the Dutch organization of applied scientific research. Currently he manages two departments, one on the use of the subsurface for sustainable energy production, energy storage, CO₂ use and CO₂ storage; and in addition he manages the Advisory Group of TNO for the Ministry of Economic Affairs. Prior to these positions he has managed the CO₂ capture and biogas department of TNO where amongst other he was responsible for the build and operation of the CO₂ capture pilot at the present location of the ROAD project in Rotterdam. In addition Dr. van der Gijp is coordinator of the CO₂ capture research program of the European Energy Research Alliance (EERA) formed by the leading European research institutes on CCUS. Dr. van der Gijp holds a PhD on Material science and an MSc on chemistry.
