Dr Tim Davies, Chief Technical Officer at Green Biologics Ltd

Tim Davies has a PhD in Chemical Engineering from the University of Manchester Institute of Science and Technology and specialised in anaerobic fermentation technology at the University of Georgia, USA. Tim worked for an industrial biotech startup, Aureozyme, and then became director of the Bioexpression and Fermentation Facility at the University of Georgia.

Since 2011 Tim has been Chief Technical Officer of Green Biologics Ltd., an industrial biochemical company focussing on the production of renewable chemicals through fermentation. In his role as CTO Tim is responsible for technology development from R&D through to process commercialization.
