

FLANDERS CLEANTECH INTERNATIONALISATION AWARDS

EUROWASTE

INTERNATIONAL SUSTAINABLE IMPACT : By evaluating specific waste issue, the company Eurowaste looks for a suitable, useful application for the waste. When a consensus is reached regarding the treatment method, Eurowaste starts up the necessary procedures towards the authorities assuring the waste streams are transported in conformity with EU waste shipment regulations. Eurowaste co-operates intensively with specialized treatment centers in Belgium, France, the Netherlands and Germany to treat each waste issue according to the Best Available Technology (BAT). The company has an answer to treating each type of waste stream thanks to the wide network of cooperative treatment centers over Europe.

ABILITY TO EXECUTE IN FUTURE – ENABLERS & INHIBITORS : Eurowaste has a strong network of waste treatment centers and laboratories and possesses strong relations with the authorities. These relations ensure smooth progress in treating its clients' waste streams enabling Eurowaste to guarantee its client a high degree of client satisfaction. The company's core values are therefore to take total care of the specific waste issues, optimal client service, competitive price setting and a permanent search for new treatment possibilities. The treatment of chemical waste is a complex matter. Each problem is different and demands a specific treatment. Eurowaste's future goals are more investments and R&D, greater overall care and offering more services.
