

## FLANDERS CLEANTECH INTERNATIONALISATION AWARDS

### VYNCKE

**INTERNATIONAL SUSTAINABLE IMPACT :** Vyncke offers decentralized energy production solutions for the industry. As a primary energy source, biomass waste flows from the industrial process itself is being used. In case the primary energy source exceeds the plants energy demands, CHP is often considered.

Being present worldwide has created the opportunity for Vyncke to build up experience with a wide variety of biomass waste flows and different energy demands, each featuring a unique set of specific project conditions resulting in unique solutions.

**ABILITY TO EXECUTE IN FUTURE – ENABLERS & INHIBITORS :** Vyncke continues to increase its local presence in emerging markets. We want to be close to our customers. The global trends to reduce the ecological footprint of industrial plants and to decentralize energy production create new opportunities. On the contrary, current low fossil fuel prices act as inhibitors.

#### INTERNATIONAL MARKET TRACTION

##### *Turnover – in EURO*

Total turnover (EURO) in 2013	58.460.000
Total turnover (EURO) in 2014	70.625.000
